TITLE : ANTIGRAVITY ENGINE

ABSTRACT : PURPOSE: To obtain repulsive force against gravity, by generating an effect similar to that inverting a spin of axiation using the principle of a differential gear after a spin of polarity is fixed of the two elementary particles in the intensified magnetic field.

CONSTITUTION: Fixing a spin direction of polarity of the two elementary particles in the intensified magnetic field thereafter generating an effect similar to that inverting a spin of axiation using the principle of a differential gear thus obtaining repulsive force against gravity as the reverse force, an antigravity engine is constituted.
